Experience

Deqode / Solution Engineer

DECEMBER 2020 - CURRENT, Pune

Fetch Ai

Working with Fetch AI on the blockchain. Researching and developing mathematical models as well as workflows for the DEX Mettalex project. The project aims to be the first commodity exchange on the decentralised internet.

CGI Inc. / Software Engineer

JULY 2019 - MARCH 2020, Hyderabad

Worked for a client designing and developing a system of apps for the client's internal use using Angular, .Net Core and Selenium for testing. I've also worked on the creation of CGI's internal education system where I build a coding platform from scratch.

Indian Institute of Technology, Guwahati / UX Research Intern

MAY 2018 - JULY 2018, Guwahati

Worked on identifying and understanding problems in the existing system of project management at I.I.T. Guwahati. Designed a new system, reducing the hassle, to replace the existing one.

OpenSource

DeckGo | Github

OpenSource Contribution

Contributing to DeckDeckGo, as an open-source web editor for presentations. It enables anyone with any type of device (desktop, mobile or tablets) to easily create, present and share presentations for free as stand-alone PWA.
